MEMORANDUM

Subject: NAVTEK Product Code Update – Transition to Official NAVTEK Product Codes

Dear Valued Customer,

To improve ordering accuracy and align our product range with **NAVTEK's** global product identification system, **RectorSeal Australia** is updating the item codes used for **NAVTEK** products.

Effective 1st July 2026 we will replace with the official **NAVTEK** manufacturer product codes across quotations, invoices, price files, product catalogues, and ordering systems.

This change will provide a more consistent experience when referencing products through technical documentation, marketing materials, training resources, and international **NAVTEK** product information. **NAVTEK** products are available through the **RectorSeal Australia** product range and online catalogue.

What Does This Mean?

When placing orders, you will begin seeing **NAVTEK** product codes instead of the current generic item numbers.

Example:

Current Item Number	New NAVTEK Code	Description
13060	NP2DLM	Cordless Vacuum Pump 2 CFM
13077	NEF6L2	Cordless Flare Tool 3/4" Max OD
13150	NSP1	Bluetooth Pressure Probe with Digital Display
13160	N2DX	Digital Manifold Gauge
13163	NP8DS	Smart Vacuum Pump

Due to the large number of code changes, we have not included the complete conversion table within this notice.

A CSW Industrials Company

Customers can access the full updated **NAVTEK** product listing, product information, and catalogue resources through the **RectorSeal Australia** website: www.rectorseal.com.au

Benefits of the Change

- Alignment with official **NAVTEK** global product codes
- Easier product identification across all documentation
- Improved ordering accuracy
- Simplified inventory and ERP management
- Consistency between technical literature, catalogues, and ordering systems

Transition Period

To assist customers during the changeover, **RectorSeal Australia** will continue to recognise both the old and new product references for a transitional period. Our customer service and sales teams are available to assist with any questions regarding code conversions or product identification.

If you require an electronic copy of the complete item code conversion list, please contact the **RectorSeal Australia** Customer Service team.

Thank you for your continued support of the **NAVTEK** range and **RectorSeal Australia**.

Kind regards,

A handwritten signature in black ink, appearing to read "Craig Bicket".
